PETER L. NERO  
SUPERINTENDENT OF SCHOOLS

DEBORAH MARTIN  
BUSINESS MANAGER

April 24, 2018

Dear Parents/Guardians:

During our weekly meeting of the construction project, we were able to tour the site to see firsthand the progress of the project. (Pictures will be posted on our website.) Many have commented that there is a tremendous amount of progress taking place. That is evident by the concrete deliveries that are taking place in order to pour the footings. The footings are poured every other day. In the days in between pours, forms and rebar are set and inspected before the next pour. It is anticipated that the foundation for the new middle/high school will be poured the last week in April. By mid-May, it is also anticipated that the steel structure will begin to be erected.

On our website you will also find pictures of some of the demolition taking place. Where you see an "X" in orange on a wall, those walls will require demolition as part of the project. As you can see, the gym floor is covered to protect it and the banners will be removed from the walls in the next few days when a "lift" arrives at the site. You will also note extensive work to the boys' and visiting teams' locker rooms and work is also being done to the girls' locker room. When that part of the project is finished, the fitness room will be located in that area.

There has been an access road graded to the far-right of the gymnasium. It will provide temporary access for heavy equipment for the installation of the new septic system. The road is totally fenced during the day; however, there is an egress for those who need access to the soccer field from the baseball side of the field at night and on weekends.

As I mentioned in my previous letter, as the project continues, we will make every effort to keep you informed.

Sincerely,

Peter L. Nero  
Superintendent of Schools
